

SAP - Center of Excellence (CoE)

Unlock the potential of SAP and maximize your business returns
With You at Every Step...

HTC, an SAP Partner, has been providing cost effective and cutting-edge SAP implementation, integration, application maintenance, development, and consulting services for over 18+ years to several Fortune 500 companies across industries. HTC's SAP Center of Excellence (CoE) has a large team of technical and functional consultants with extensive experience in delivering flexible and collaborative solutions. HTC has extensive experience and expertise in providing SAP services such as - Business Consulting, New Implementation, Support and Maintenance, System Migration, Landscape Transformation, Extensibility with HCP, Innovation Adoption, and Professional Services

HTC's SAP CoE works with you to:

- Implement SAP and provide continuous support services
- Resolve your critical pain points, which are not addressed by your existing SAP implementation
- Enable your business to utilize SAP to its full potential by suggesting industry standard best practices

HTC comprehensive SAP service offerings include:

- SAP ECC 6.0 – the integrated ERP software
- SAP S/4 HANA – the next-generation business suite that helps you run simple in a digital and networked world

HTC's SAP CoE helps you derive maximum business returns from your SAP investment by:

- Optimizing business processes through process improvements
- Automating repetitive tasks with innovative bespoke solutions
- Improving user adoption through role based process trainings
- Supporting continuous coherence and integration of functionality and data in all your business processes

HTC's SAP CoE works with the latest infrastructure enabling:

- Superior control over key business areas with SAP ECC 6.0, SAP Best Practices across industry verticals

- Significant functional and project management expertise that is second-to-none, assisting you by leading and delivering successful SAP deployments
- Exceptional technical and project management expertise that is imperative for successful SAP deployments
- Utilizes the power of S/4HANA Enterprise Management solution to deliver end-to-end implementation and application support for next generation digital transformation with the SAP S/4HANA EM tool
- Comprehensive SAP IoT solutions for various line-of-businesses enabling automation of crucial processes to gain a competitive edge in the industry
- Secure access to business from anywhere, any time with SAP mobility solutions using Fiori and cost effective hybrid solutions such as SuccessFactors, Ariba, Hybris etc. for managing business efficiently
- Operational Process Intelligence providing complete control over your business processes with substantial visibility to trace out opportunities and threats quickly
- Enhanced decision making with SAP IQ that unleashes the power of data warehousing and analytics applications to deliver results
- Cloud and server based SAP Lumira platform that helps visualize data combined from disparate sources empowering decision makers to identify hidden trends and patterns

Reimagine technology to accelerate your business

- Predictive Analytics solution that works with the legacy and SAP platform data sources helps organizations to build predictive models for gaining prodigious insights
- Leverage existing information assets to strategize, plan and transform business with SAP solutions for Enterprise Information Management (EIM) and Enterprise Performance Management (EPM)
