

Application Development

Cost Effective Application Development

Developing application is not a child's play! We at HTC Global take application development seriously. Our promise is full satisfaction to the client in their dreams being transformed into reality. HTC Global is your reliable partner when you are transforming your idea to an actuality.

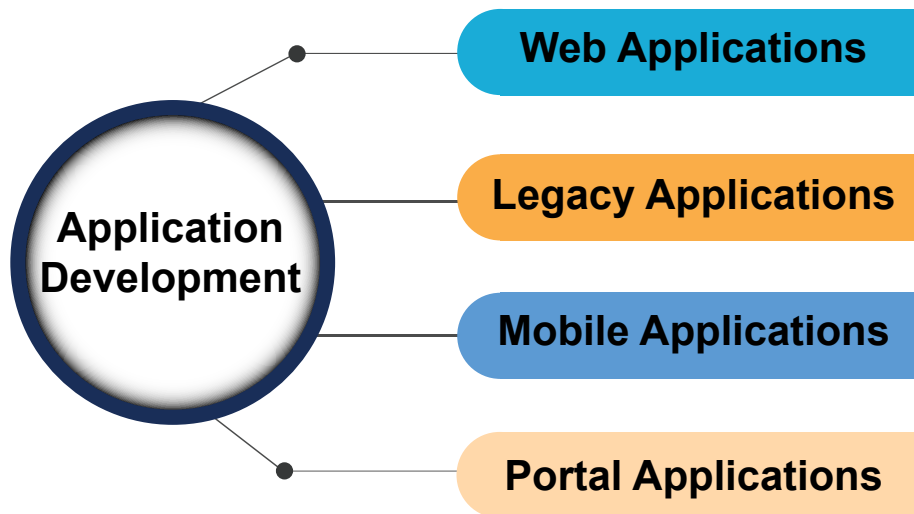

A fully mature application that is up and functioning goes through a structured process that only a seasoned application development company can fulfill. At HTC Global we maintain a stringent process right from the word go. Starting from research, new development, modification, re-engineering, modernization, or maintenance and support, and any other related activity for the application completion, we have ample experience and resources to support.

With more than two decades of hands-on experience in application development, HTC Global is a trusted partner to many Fortune 1000 companies. Our Centers of Excellence (CoE) for various technology stacks support our application development. We have competency in developing applications using Microsoft, Mainframe, Oracle, Java / Opensource technologies.

HTC has a wide and varied experience in a variety of development methodologies such as V-Model, Agile, Scrum, and Iterative Development. HTC adopts the best-fit approach for your application to deliver optimal solutions.

HTC Global has proprietary web-based project management tool, PPMA to manage all phases of the application development that allows to keep a track of every detail of the application.

HTC is fully experienced in developing applications in the following areas:
