HTC's Proposition

HTC's unique value proposition is that while we migrate your historical and mission critical data from older versions to new, we take all due care not to lose, or compromise the security of the existing data. We assure you of a seamless business continuity with a pristine conversion process that allows for optimizing your existing data. Our dedicated design, development and deployment teams make steadfast efforts to enable the client application to function smoothly.

We measure our success with your approval!

HTC's Success Story

A Top Rated University in the USA Faces the Challenge of Data Migration

Universities have a huge amount of data stored in Data Management Systems. They depend on vendors for this data for maintenance. A popular State University had Document Management System (DMS) in place when suddenly their vendor withdrew support for their applications creating unworkability. They were unable to meet the financial obligations and faced a discontinuity in business.

HTC Offers a Way Out

HTC Global services is a name to reckon with in the IT Solutions Domain. One of our successful solutions is the conversion of legacy Document Management System to CICS/BMS for one of the top rated state universities in the USA. Without disturbing the existing data, HTC migrated the application with a mandatory support from our team. This has not only assured business continuity, it has also made a difference in meeting financial obligations.

About HTC:

- Over 26 years of IT and BPO experience in providing cost effective and innovative services across domains for a wide spectrum of global 2000 customers
- Quality and information security processes compliant to SEI CMM Level 5, ISO 9001, ISO 27001 and PCI DSS standards
