

Digitization of 200-Year-old Literary Manuscripts

A leading content aggregator

The client is a leading provider of learning and research solutions for the academic, professional, and library markets worldwide.

Project/Service Category

Archival Digitization

Services Provided

- Microfilm Scanning
- Image Enhancement
- Finding Aid Indexing
- Handwritten Indexing

Background

The client wanted to digitize Literary Manuscripts and publish it online to enable students and researchers effortlessly cross-search and access the 200-year-old Literary Manuscripts collections.

Challenge

Recognizing the 200- year- old handwritten manuscripts and capturing them at 97% field level accuracy.

Solution

We deployed History & Literature Graduates as SMEs and trained them to recognize handwritten characters / names / places. The digitization service involved scanning from microfilm, image enhancement, grouping at document level, capturing metadata and faux item from handwritten content, capturing data from finding aid, linking finding aid and manuscript images, and delivering the images and XML files.

Benefits

- Our timely deliveries enabled the client to publish the contents online ahead of schedule
- The client realized a significant increase in online subscriptions, renewals, and revenue
