

# Automotive and Manufacturing Practice

## Speed up innovation to enhance growth opportunities

Digital disruption and digital transformation compels manufacturers to adopt new business models and speed up innovation to enhance growth opportunities.

HTC's innovative, cost effective, and customized IT offerings enable manufacturers manage disruptions and challenges and improve agility and efficiency by:

- Reducing cost
- Shortening product life cycles
- Collaborating better
- Effective monitoring and control of inventory and manufacturing operations
- Maximizing ROI
- Achieving operational excellence
- Delivering greater value to customers
- Enhancing customer satisfaction.

## IT Solutions

HTC's IT solutions include:

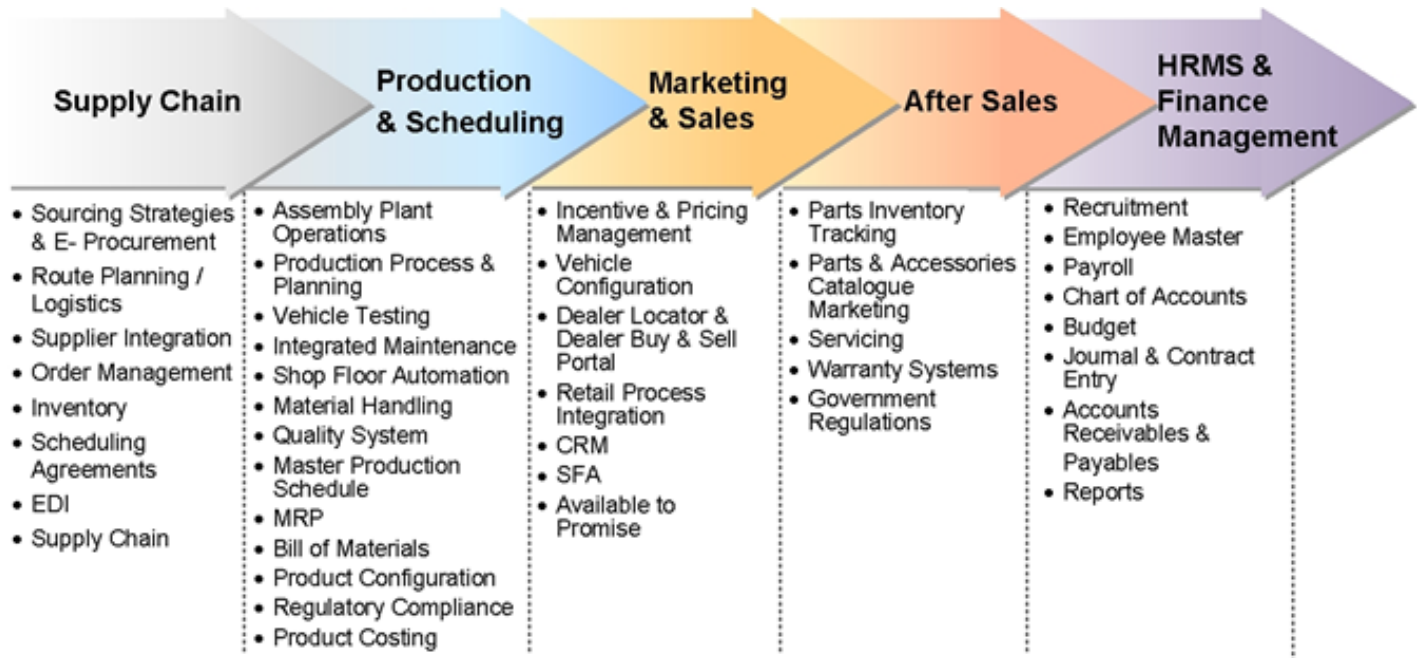

- Supply Chain – optimize goods flow, reduce costs and product lifecycles, minimize risk, reduce complexity, and achieve rapid ROI with effective management of spare parts, inventory, raw materials, real time supply, and transactions
- Production and Scheduling – efficiently manage resource requirements to meet manufacturing operations and create reliable real-time production schedule for making informed decisions
- Marketing and Sales – coordinate and align marketing and sales efforts by integrating marketing insights with effective sales methods
- After Sales - increase profit and enhance customer satisfaction with efficient after sales service
- Human Resources and Finance Management– workforce planning, managing people, policies and procedures, talent, and payroll for the employees, and managing financial operations receivables and payables, and generating accounts reports

### Highlights:

- Optimize and reshape business processes
- Achieve operational excellence
- Realize business transformation
- Speed-up product development
- Improve serviceability
- Bring business improvements
- Minimize learning curve
- Maximize ROI

Reimagine technology to accelerate your business
