

Banking & Financial Services

Transformational IT services that helps you to meet your business challenges successfully

HTC's IT Services to Banking and Financial Organizations

Regulatory and compliance changes and expanding digital expectations of customers compel the Banking and Financial Services (BFS) sector to transform their IT landscape for accommodating new technologies and offering enhanced customer experience. This imposes new challenges in the areas of security and authentication. HTC's innovative and cost-effective IT solutions and services enable BFS organizations to reorganize their IT landscape, accommodate new technologies, improve security and authentication, simplify banking operations, offer enhanced customer experience, expand customer base, and meet regulatory requirements at reduced TCO.

Reimagine technology to accelerate your business

IT Service Offerings

HTC provides customer-centric IT services to several Fortune 500 (B&FS) organizations by combining domain, technology, and process expertise in the following areas:

- Analytics – helps you to derive valuable business insights from day to day business transactions data
- Digital – permits you to effectively manage your customers' digital banking demands
- ECM / BPM – supports building business process and smart decision making to drive business growth
- Testing – third party testing / Independent Verification and Validation (IV&V) complements your in-house testing efforts by bringing independent perspective to your testing lifecycle and improves quality by mitigating technical and business risks while reducing costs and time-to-market
- ADM – HTC develops customized solutions that meet your exacting needs at lower TCO. Our application maintenance maximizes application availability, agility, and predictability by eliminating application downtime and improving ROI
- Legacy Modernization – aligns your IT assets with the changing technology and business needs
- Mobility – permits anytime, anywhere access to effectively meet your customers' mobile demands
- IT Infrastructure Services – makes your IT infrastructure up-to-date, secure, and available in real time, all the time to meet incessant business demands and extract maximum value from your IT investments

HTC's IT Solutions

HTC's customizable solutions include:

- Customer Data Standardization - ensures the quality of your customers' contact details to connect and serve them better by standardizing email addresses, contact addresses, and phone numbers
- Customer Identity Resolution - resolves on-obvious identities / relationships to discover people within a household, organization, or a locale, retrieves credit worthiness and demographic details, validates KYC, and performs watch-list filtering
- Governance, Risk, Compliance - simplifies, streamlines, and makes GRC processes seamless by aligning risk and governance management with your strategic business goals by identifying risks and empowering well-informed decision making
- Regulatory Reporting Solution - automates and streamlines processes for generating accurate and timely reports - scalable and flexible to meet future demands
- Trade Order Management System - manages orders, streamlines global trading requirements, and improves operational efficiency by automating processes to achieve straight-through processing

About HTC:

- Extensive experience in providing cost effective and innovative IT and Business Process Services and Solutions across domains for global customers since 1990
- Quality and information security processes compliant to SEI CMM Level 5, ISO 9001, ISO 27001, and PCI DSS standards
- Global presence, large delivery centers, talented professionals, capabilities across multiple technologies, platforms, and domains
