

# Education

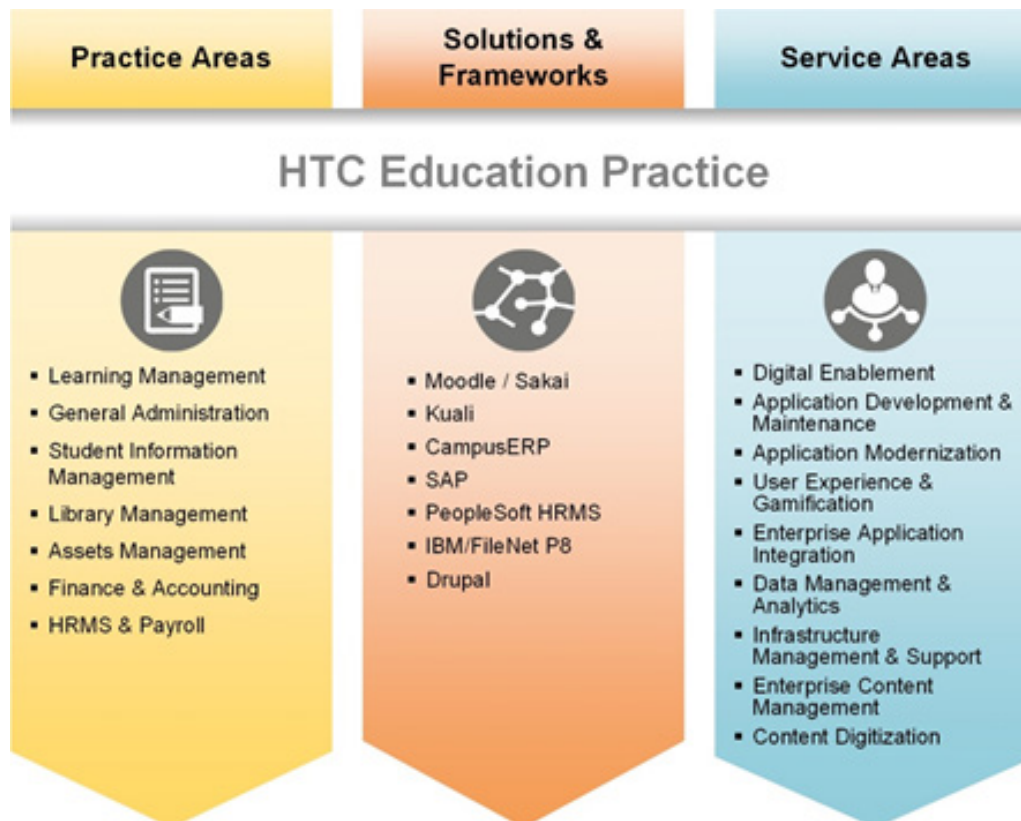

## Digital Transformation of Education

### Enhance teaching and learning outcomes with digital enablement

The digital wave imposes disruptive transformation in all sectors and education is no exception. The entire extent of education – textbooks, classrooms, learning sessions, etc. is rapidly going digital. Digital supports better collaborative learning with effective participation from anywhere.

### HTC Education Practice

HTC's Education Practice has been developing and implementing customized IT services and solutions for over two decades to several leading academic institutions all over the world.

Reimagine technology to accelerate your business

## HTC's IT Service Offerings

HTC's IT service offerings include:

- Digital Enablement – build, align, and enable high-performing platforms to address the digital transformation requirements
- Application Development and Maintenance – develop and implement customized applications that enhances academic and administration tasks
- Application Modernization – transforms your legacy applications to the latest and emerging technologies to make them contemporary and future ready
- User Experience and Gamification - incorporate gaming into existing processes to boost productivity, improve skills, drive performance, and attract more customers with interactive technologies
- Enterprise Application Integration - integrates disparate business applications by modernizing, consolidating, and coordinating them to eliminate IT complexities, improve interoperability, collaboration, and coordination
- Data Management and Analytics – track student's performance, optimize learning experience, forecast performance to enable student retention, and derive valuable insights for appropriate decision-making
