

Open ERP

Open ERP that is way ahead of all traditional ERPs

HTC's Odoo Center of Excellence (CoE) custom develops, implements, and provides post implementation support and enhancement services for the Odoo based Open ERP solution. HTC's Odoo based Open ERP is a comprehensive suite of integrated business applications built using open source technologies that reduces the Total Cost of Ownership (TCO) for customers.

The use of Odoo is rapidly increasing globally due to its flexibility, adaptability, modularity, usability, and low Total Cost of Ownership (TCO).

HTC's Odoo based open ERP is currently available with the following modules:

Human Resources - empowers planning, development, and administering policies and programs for the efficient use of human resources and effectively maintain their working relationship with the organization by taking care of the organization's business goals and career aspirations of the human resources

Recruitment - automates and simplifies the entire recruitment process of finding, attracting, assessing, interviewing, hiring and onboarding candidates

Reimagine technology to accelerate your business

Resources - permits efficient and effective deployment and allocation of resources according to requirements with appropriate planning, allocation, and scheduling as it impacts schedules and budgets as well as resource leveling and smoothing

Timesheet - enables quick and easy entry of timesheet details along with appropriate review and approval mechanisms for efficient calculation of efforts and costs

Leave - permits defining employee leave types, enables availing and approving leave, viewing leave entitlement, balance, and history

Employee Performance Appraisal - systematic evaluation of employees' performance to understand the employees' capabilities for enabling career growth

Employee Exit - manages the entire processes related to voluntary resignation of employees, termination of employees through layoff / dismissal / contract employment

Project - manages the entire scope of tasks from project inception to closure with focus on process compliance

Finance and Accounts - manages the process of recording, summarizing, and reporting of financial transactions over a period of time and preparing transaction summaries / financial statements (balance sheet, income statement, cash flow statement summarizing the organization's operating performance for the specific period)

Payroll Process - manages the entire payroll process, salary disbursement, and income tax routines

Travel - manages employees' travel requirements in compliance with the organizations' travel policies, procedures, guidelines, and eligibility criteria

Reimbursement-manages settlement / reimbursement of travel expenses according to employees' eligibility criteria

Purchase and Stores / Materials Management - coordinates planning, sourcing, purchasing, moving, storing, and controlling materials in an optimum manner enabling the organization to provide customers service at pre-decided levels at minimum cost

Sales - manages the development of the sales force, formulation and implementation of sales strategies, coordinating sales operations, and implementing sales techniques to enable meeting and exceeding the sales targets

CRM - permits managing, organizing, tracking, and storing customer data and customer interactions information throughout the customers' lifecycle with the goal of improving business relationships with customers, assisting customer retention, and driving sales growth

HTC's Odoo based Open ERP is available as a web based solution and also in the cloud.

HTC's quest for continuous improvement provides endless opportunities to improve by incorporating new features / modules, optimizing effective customization, and providing better user experience.
