

Simplify, Streamline, and Automate Grants Administration and Management with HTC's **EGrAMS**

EGrAMS is a web-based, configurable, and scalable solution that simplifies, streamlines, and automates grants administration and management processes, reduces administrative burden, and improves transparency and accountability.

EGrAMS supports all functional areas of the grant life cycle from Planning through Closeout. With its exhaustive configuration features, EGrAMS helps grant giving organizations to implement their grant programs easily and quickly and automate all phases of the grant life cycle:

- **Application Management** – online application entry, validation, submission and printing; submission of financial and progress reports
- **Review Management** – online review, scoring and commenting, score tabulation, ranking and recommendations
- **Approval and Award** – multiple levels of approvals and generation, notification and acceptance of contract and agreement
- **Progress Reporting** – online entry, validation and submission of progress reports; review and approval of progress reports
- **Payments** – supports Pre-payments, Cost Reimbursements and Operational Advance; as well as interfaces to external financial systems based on configurable charging models
- **Amendments** – budget amendments, line item transfers, and other revisions, and generation of amendment contracts
- **Closeout** – validation of applicant obligations and contract closeout

EGrAMS Features
