

Mobility Solutions

Realize the immense potential of mobility with HTC's end-to-end mobile solutions

Mobile technology offers the convenience of being available "On the Move". Enterprises are realizing the immense potential of mobility and are providing mobile first and mobile-centric solutions to reach new markets. HTC's mobility solutions empower enterprises to capitalize on the capabilities and expand their business potential.

HTC's offerings include a wide range of customized end-to-end technically outstanding, cost effective, seamless, fault tolerant, scalable, sustainable, and feature-packed native mobile applications for all the major mobile platforms (iOS, Android, and Windows Phone), and using Hybrid (PhoneGap, Kony, SAP/SUP, Unvired) Framework that works on any device or platform. Our mobile solutions helps clients realize greater business value and ROI at reduced TCO.

Service Offerings

HTC builds mobile view, synchronize data between mobile devices and enterprise cloud, and perform testing in multiple devices. Our service offerings include:

Strategy Consulting: Our Mobile Strategy Team defines the Mobility landscape and setting the Mission, Vision, and Goals (both short-term and long-term) for the customer. A quick Proof of Concept (PoC) can be a part of the deliverable to present the end-user experience, interactions, and to explain how the brand is represented.

UX Design: Our certified UI/UX experts understand the individual needs by analyzing the user requirements and their adoptability, and design mobile applications that provide rich user-experience.

Design and Development: HTC's proprietary frameworks and tools accelerate the development in building the overall mobile solution at a rapid pace. Extensive set of re-usable libraries that were already tested in the field are used to make the rapid application development easier.

Quality Assurance: Our agile QA process includes

extensive mobile application testing based on an integrated testing process throughout the development lifecycle that includes testing based on end-user perspective, OS and hardware compatibility, usage, performance, and security.

Distribution: We provide effective App store management (Apple store, Google Play store, Windows Store) and relevant patch with complete control and version management.

Sustain: We offer customized Service Level Agreement (SLA) and maintenance schemes to implement them based on customer needs.

Solution Offerings

HTC's Mobile CoE delivers a wide range of mobile solutions in the areas of user profiling and segmentation, location based services, Field Force, mCommerce and analytics, telemedicine/consultation, enterprise applications integration, data capture and auditing, wearables and Internet of Things (IoT), and location based solutions.

Reimagine technology to accelerate your business

Mobile Solution Strategy

Technical Competency and Framework

HTC's domain expertise in mobility includes retail, healthcare (telehealth), FMCG, BFSI, education, and government. Our further platform capabilities include, native and hybrid based solution development. HTC also provides analytical and Master Data Management solutions using MicroStrategy, QlikView, Tableau, and Mobile Device Management solutions based on WSO2 and AirWatch. Our association with various technology/product companies' help in offering the state-of-art cloud based mobile testing services.

We use our proprietary frameworks to provide business benefits such as faster-go-to-market, application reliability, and security. We seamlessly manage connectivity between heterogeneous and enterprise systems using the following frameworks:

WebMorph: UI build framework aimed for enterprises that need to mobile-enable their applications and address platform, device, and screen agnostic challenges quickly and efficiently.

SmartSync: Framework to bridge the gap between Enterprise Mobility and Enterprise Systems. It is a robust, secured, scalable synchronization architecture for seamless integration with enterprise hosted applications.

RoboTest: Automated solution for testing mobile applications with minimal manual interventions and quick turnaround that provides automated status updates of the testing process.

SecureIT: Advanced software tool for scanning mobile applications to identify security vulnerabilities on various parameters.

SmartPack: Packaging and distribution platform for enterprise mobile applications that helps maintain application specific system libraries/scripts and build history.

SmartChart: User friendly and configurable graphical dashboards that support both real-time and offline visualization with interactive drill down capability

About HTC:

- Extensive experience in providing cost effective and innovative IT and Business Process Services and Solutions across domains for global customers since 1990
- Quality and information security processes compliant to SEI CMM Level 5, ISO 9001, ISO 27001, and PCI DSS standards
- Global presence, large delivery centers, talented professionals, capabilities across multiple technologies, platforms, and domains
