

THE NEXT GENERATION CASE MANAGEMENT FOR PROSECUTORS

CMP NextGen

Public attorneys need a modern system that sets the foundation for a digital, paperless, and secure environment while revolutionizing the way case information is collected, stored, accessed, retrieved, and shared among all constituents.

A modern and integrated case management system is now a must.

 The justice and public safety landscape has changed dramatically. With caseloads increasing, remote work becoming the norm, and changing mandates and compliance requirements adding additional complexities, Public Attorneys are finding that their old case management systems just can't keep up. They need a modern system that sets the foundation for a digital, paperless, and secure environment while revolutionizing the way case information is collected, stored, accessed, retrieved, and shared among all constituents. Anytime, anywhere, access and on their preferred channel is also crucial. By streamlining processes and improving workflow, agencies can work more efficiently and effectively, providing their clients with the highest level of service possible.

Yet many agencies are still lagging, relying on outdated systems. It's time to break free from legacy and embrace a modern, fully integrated case management system with comprehensive functions and an integrated workflow to tackle today's challenges head-on.

Reimagine Public Attorney Case Management with HTC's CMP NextGen. Offering comprehensive features and functions to digitize the entire Public Attorney office to eliminate the reliance on physical case files, it ensures real-time access to critical data to the right person, at the right time, and in the right place.

Enterprise-grade Case Management - Reimagined

CMP NextGen is an Enterprise Case Management Solution built using next-generation, born-in-the-cloud technologies. As a modern, browser-independent, and comprehensive case management platform, CMP NextGen digitizes end-to-end case management tasks and provides easy collaboration necessary for criminal and civil matters.

For a quarter of a century, HTC Global Services, Inc. has been serving the justice community with our technology and solutions. We have led the charge in helping State and Local government embrace the power of innovation. Our portfolio includes some of the industry's first-of-their-kind technologies, tools, and expertise designed to deliver maximum impact. Our latest addition, CMP NextGen, is a game changer. Built on a cloud-first architecture, it leverages our best-in-class platform, Roots Framework, which abstracts functional modules from underlying technology components, providing the ability to leverage the native capabilities of today's technology norms. This modular approach allows us to provide tailored solutions that meet unique hosting and integration needs while avoiding the high costs of significant customization associated with other COTS products. Additionally, our Case Management platform meets current and future agile needs through the use of innovative technologies such as microservices and containerization.

Offered as a SaaS (software as a service) model, clients have the option of choosing fixed monthly fees, per seat, or according to our volume pricing tiers. Key modules and functionalities include:

- My Cases Dashboard
- Digital Evidence
- Constituent Portal
- Justice Agency Sharing
- Case 360 View
- Anytime, Anywhere Access
- Docket Management
- Court Calendaring
- Charging Documents
- Motions
- Letters
- Subpoenas

Prosecutors and Government Attorneys now have a function & feature rich environment to manage criminal, civil, juvenile, family, and other matters in a collaborative manner.

Collaboration With Partner Agencies

Easy collaboration with partner agencies such as police departments, courts, pre-trial diversion, probation departments, and others to streamline workflow across agencies. This ensures deadlines are met and public safety services as a whole are coordinated.

Born-in-the-cloud

Leveraging "born-in-the-cloud" technologies, CMP NextGen provides a modern, browser-independent, and comprehensive case management platform. As new services and components continue to emerge in the cloud, such as evidence repositories, legal brief banks, content management systems, and others, CMP NextGen easily interoperates with them to extend the digital capabilities of the prosecutor's office.

Remote Workforces

On-the-go, seamless access to information—from computers in the office, laptops at home, tablets in the courtroom, or mobile devices—empowers attorneys, staff, and investigators to handle caseloads with greater efficiency.

Active Business Process Management (BPM)

CMP NextGen provides Active Workflow Management to enable transactional efficiency among teams, departments, tasks, notifications, and assignments to keep each case on time and on track.

Role-based Work Queues

A central place to act - Cases, Events, Tasks, Assignments & Notifications all in one place - provides everyone in the office, based on their role, a central place to act, ensuring activities and tasks are completed on time.

WHY CMP NextGen

The case management platform is designed to not just bring convenience but also positively impact the quality of legal services.

- Digitizes all case management tasks and eliminates the need to manage physical case files
- Generates letters, motions, subpoenas, and charging documents in coordination with defined workflows
- Keeps processes on schedule with Active Workflow that automatically triggers next steps and eliminates bottlenecks
- Streamlines workflow across partner agencies to ensure deadlines within the jurisdiction are met
- Provides timely, anywhere access to relevant information for the right people at the right time
- Provides access to citizens if required to initiate complaints, referrals, or view public information
- Keeps up with changing regulations, practices, and preferences with easier configuration capabilities
- Saves time and controls labor costs by automating manual and paper processes

CMP NextGen

The Differentiating Features

- Jurisdictional configurations for local practices and preferences
- MyWork dashboard based on office role, team, unit, or department
- Integrated, configurable workflow and rule-based task routing
- Browser-independent, multi-channel support
- Highly secured functions and features
- Comprehensive audit functions
- Advanced search and context-based search capabilities
- Fully integrated document management capabilities
- Template-based forms and document generation
- Comprehensive digitization (paperless) capabilities
- Constituent portals to embrace officer, victim, witness, and citizen interactions
- CJIS compliance: audit logging and security
- Cloud-first architecture
